Model **ES-12** — features a 100m deadzone

Model **ES-12-500** — features a 500m deadzone

The **ES-12 Universal Cross-Connect** is a single box solution to interconnect multiple types of connectors. This multi-purpose product also incorporates a singlemode deadzone launch fiber which can be easily added into the fiber under test with a quick jumper connection.

The ES12 eliminates the need for hybrid patchcords and thus greatly reduces the number of patchcords the technician must keep on hand to facilitate testing in a multi-connector environment.

Its lightweight, compact, rugged design will ensure long service in a variety of applications. This is your quick and easy solution for testing or link commissioning.
